Inspector Observations:

Inspector went to Vons #2660 in response to this complaint (CO0070301) and spoke with the store manager, April Lay. EMWD Source Control Manager, David Trujillo, was also present. Manager, Ms. Lay, stated that they had discovered a clogged floor sinks and floor drains in the deli prep area about 1 hour ago. She then opened up a service request for plumbing service. A few minutes afterward, customer informed her that the side parking lot has water overflowing above the interceptor outlet.

At this investigation, the water overflow observed mostly under the floor sink below 3 compartment sink and coming thru the floor drains around the fryers and back prep/warewashing area. No odor of sewage was detected in the deli. Observed pockets of pooled water under fryers and 3 compartment sink in the back deli's prep area. Observed pool of water near floor drain behind the sandwich service station. Manager stated that this was mop water from previous clean up of a spill. Unable to verify if any equipment in back prep area were affected from splatter or drains or floor sink overflow. The flooring under the equipment and tables, was observed wet and grimy. Ms. Lay was directed to cease all food production in the deli until the grease interceptor and all floor drains and floor sinks are cleared of clog and properly clean out. In addition, Ms. Lay was directed to have the floors and all equipment deep cleaned prior to be re-inspected. Ms. Lay complied, directing staff to cease operation. Inspector observed no active flow from the interceptor outlet in the parking lot but did see water remnant and streak going to the storm drains. Instructed manager to provide absorbent materials around the storm drains at this time while waiting for professional clean up company. Instructed manager to block off the parking lot so no vehicles can park in this area. Inspector confirmed a quaternary ammonia based sanitizer (300 ppm) was being used on the flooring. Notice of violation given to manager, April Lay. Pictures overflow taken. Instructed manager to contact inspector at luanle@rivco.org for any questions or when deli is ready to be open. No overflow or clogged drains or floor sink at the bakery and starbucks area. No overflow or clogged drains in janitorial room or restrooms.
